STATISTICS DENMARK

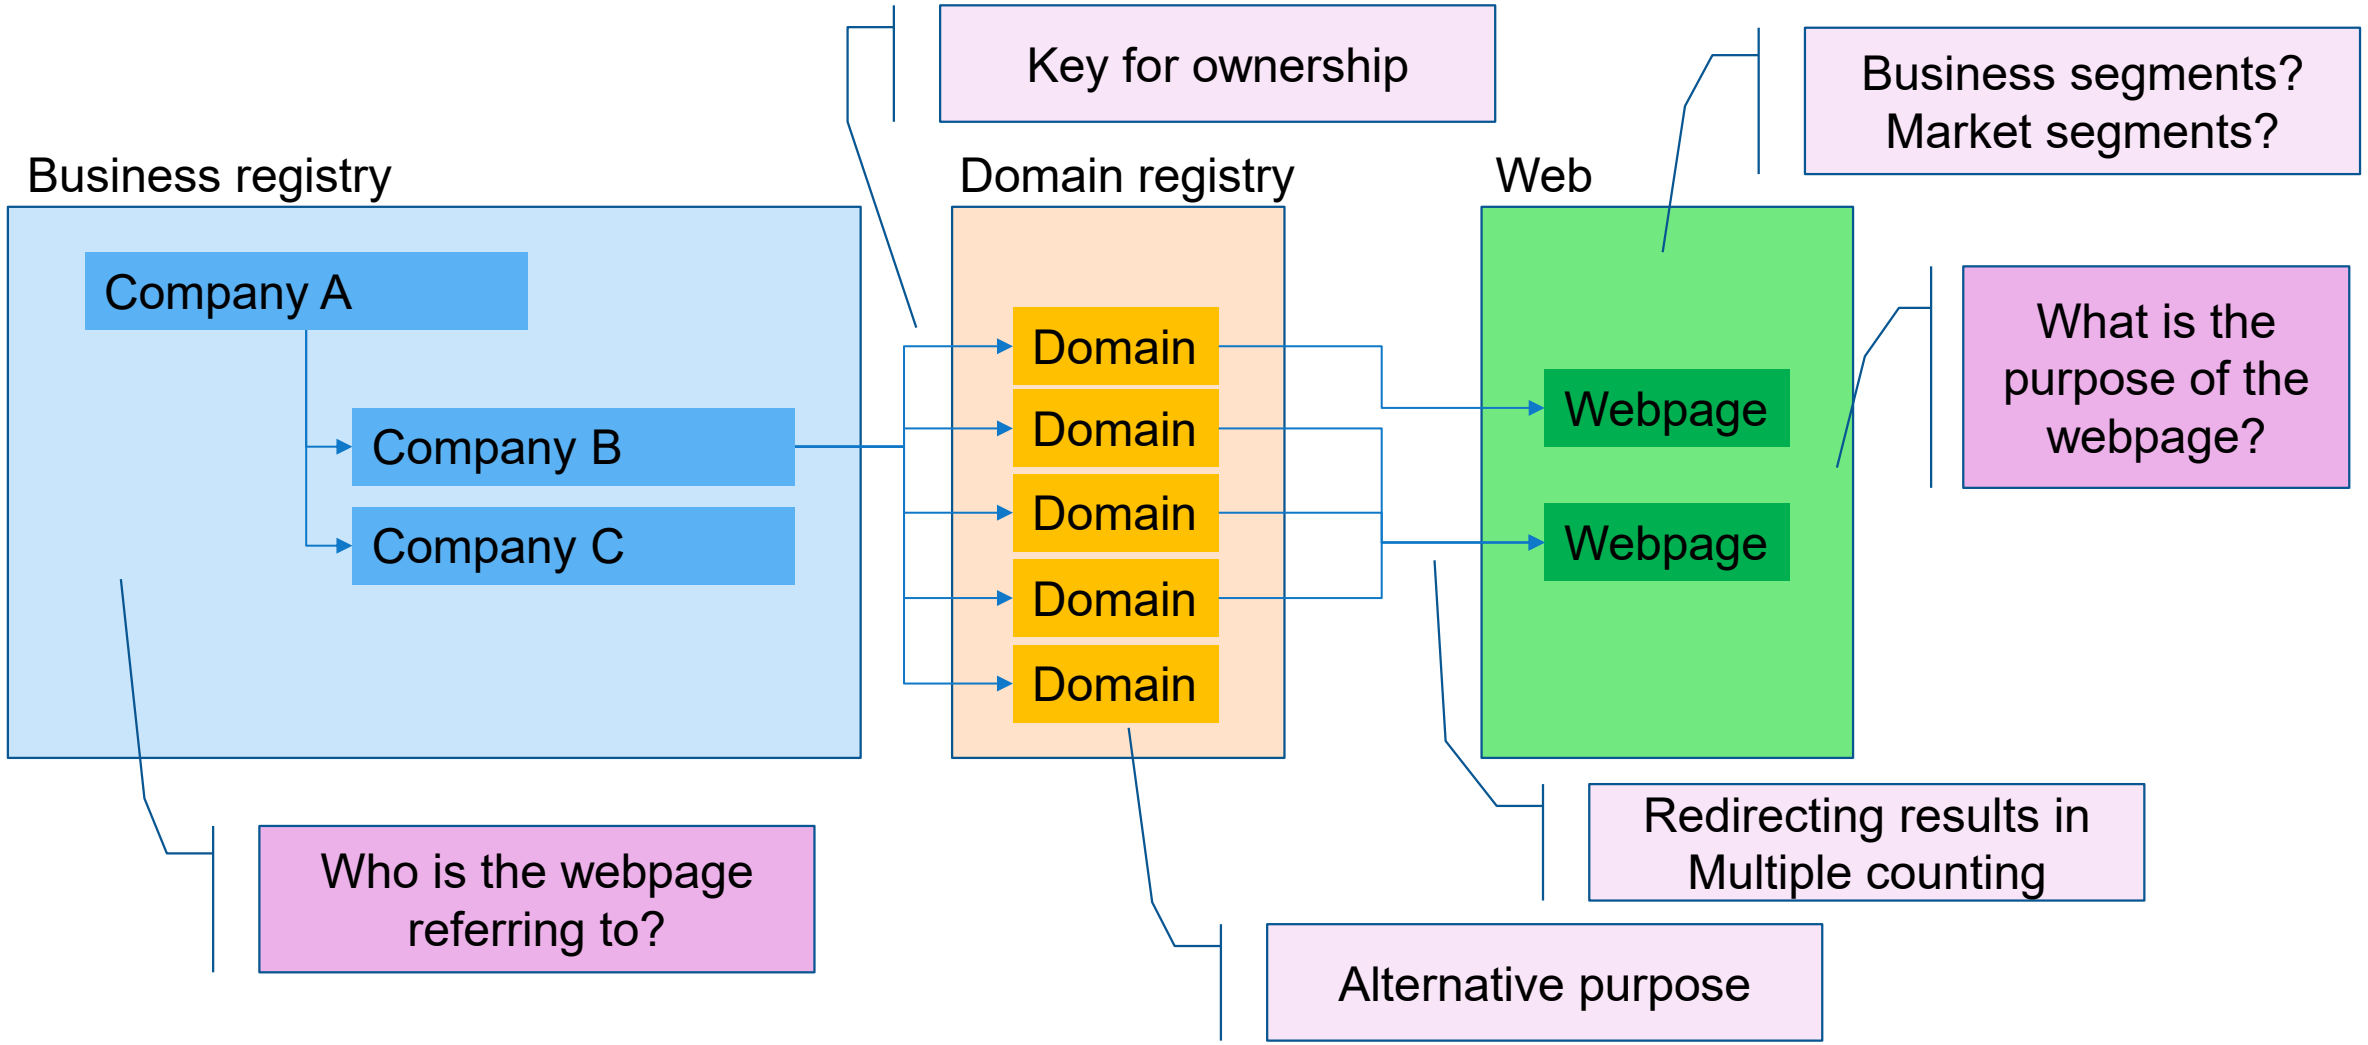
- National top level domain registrar has accepted to deliver data
- Different departments in STAT-DK have looked at how to use data
- Our SBR will include the URL information and relevant metadata
- Micro data linking
- Three body problem: New data sources, AI and open source coding
- My dream is a statistical cookie on all websites
- And you will all have data from national top level domain registrar

Companies and webpages

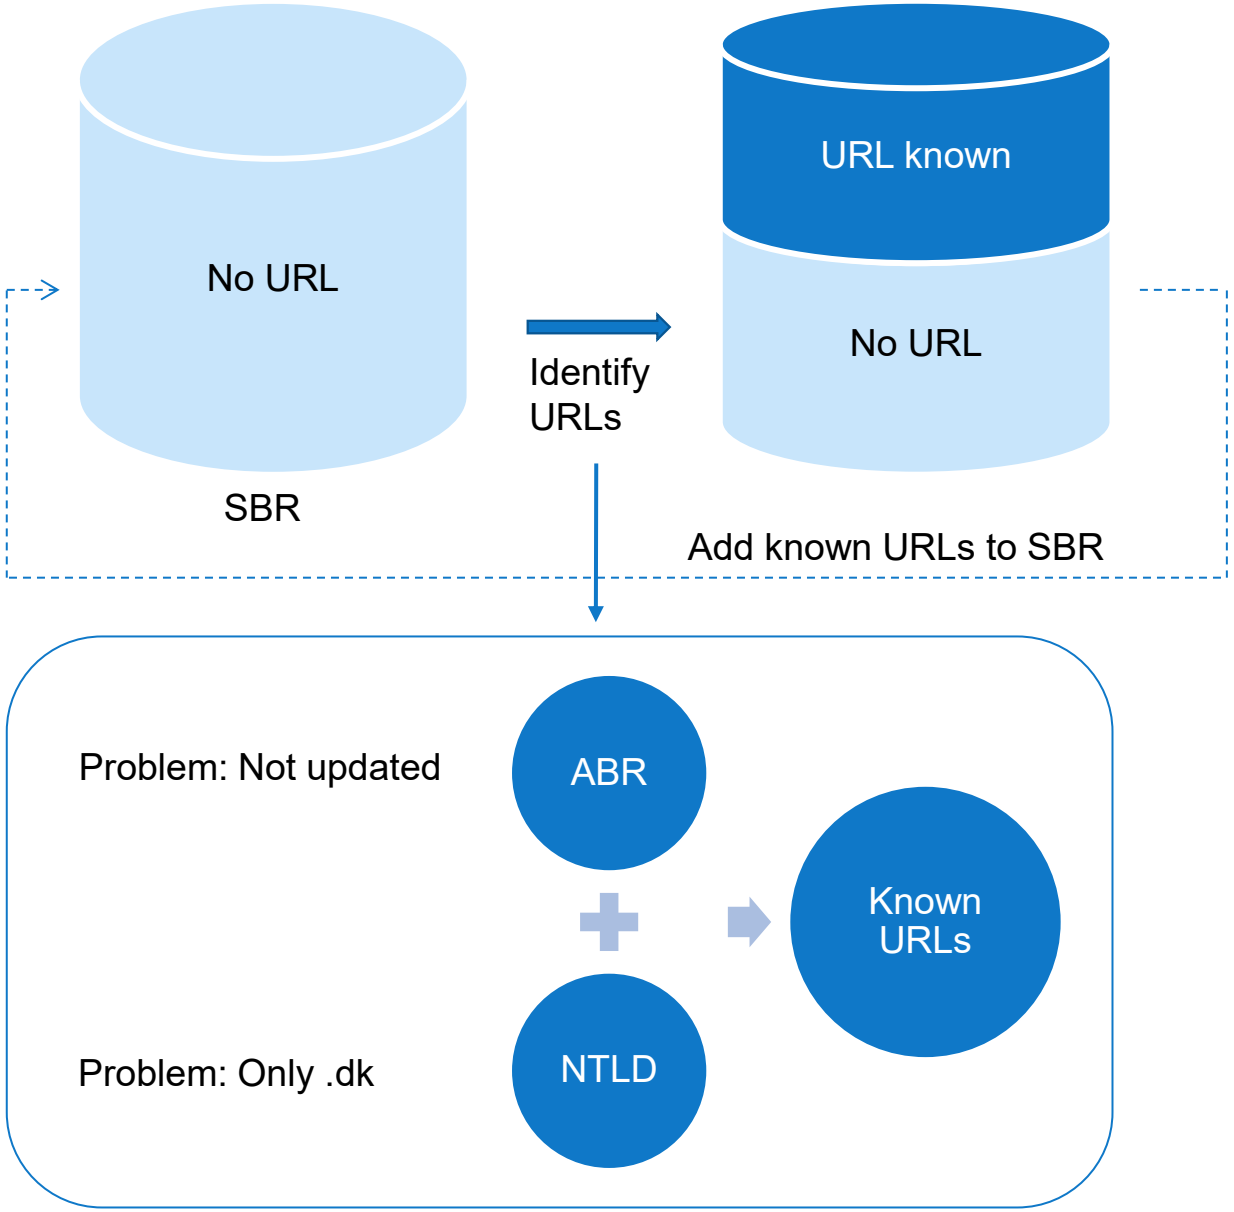


Resource equation

STATISTICS DENMARK

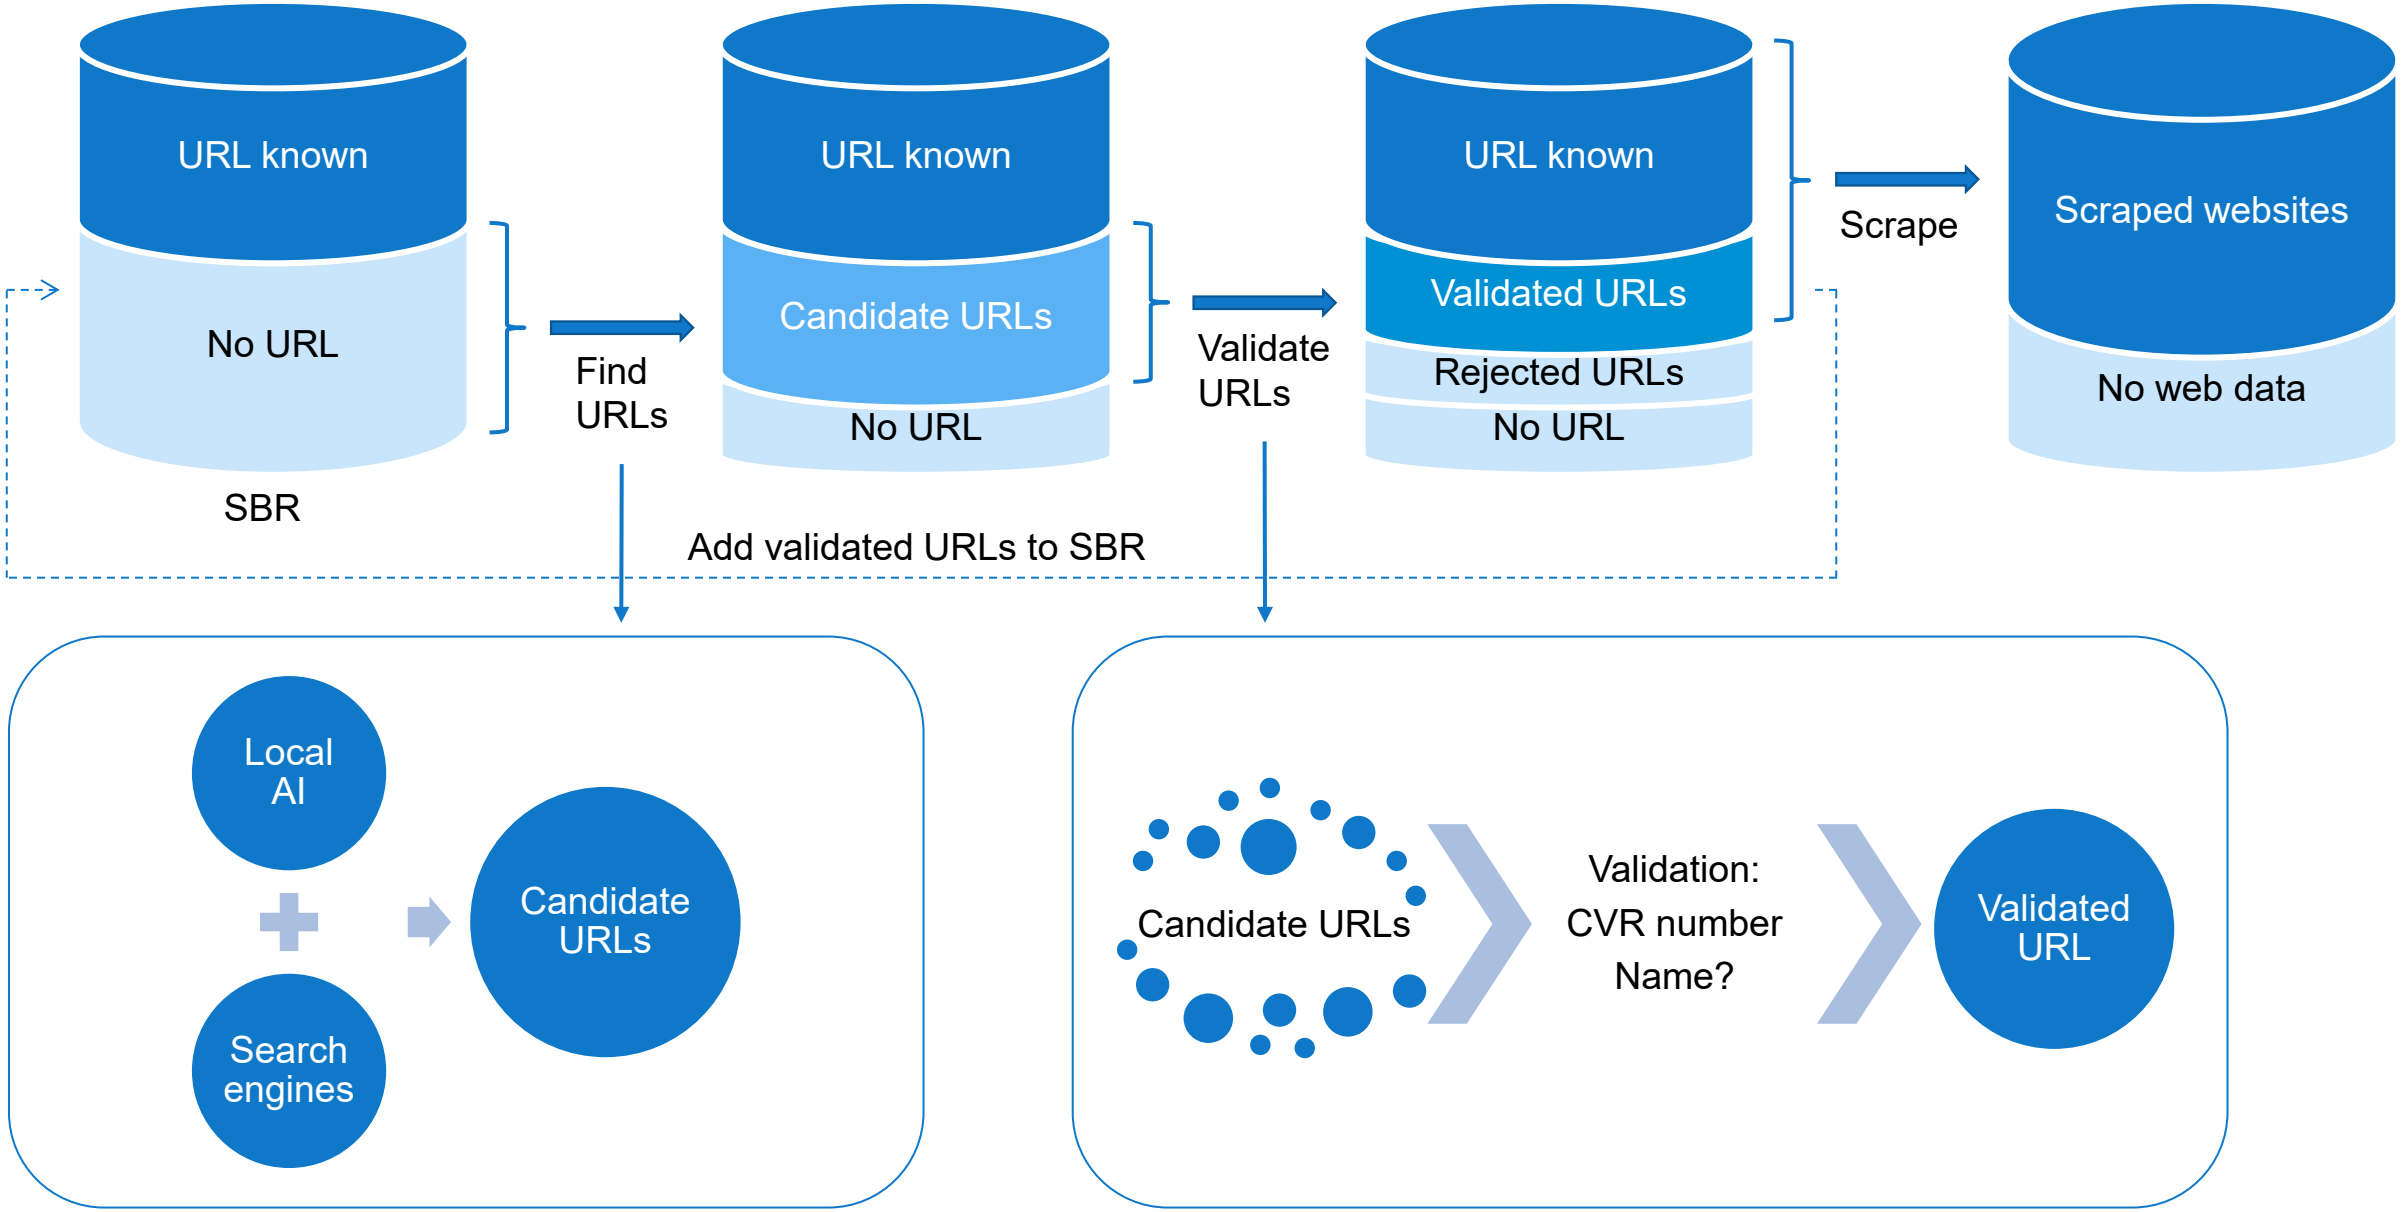
Number of domains	X	Time it takes to analyze	=	Web analysis
1.6 mio.	X	30 sek.	=	1.5 years
? mio.	X	? sek.	=	< 1 month

URL in SBR process 1/2



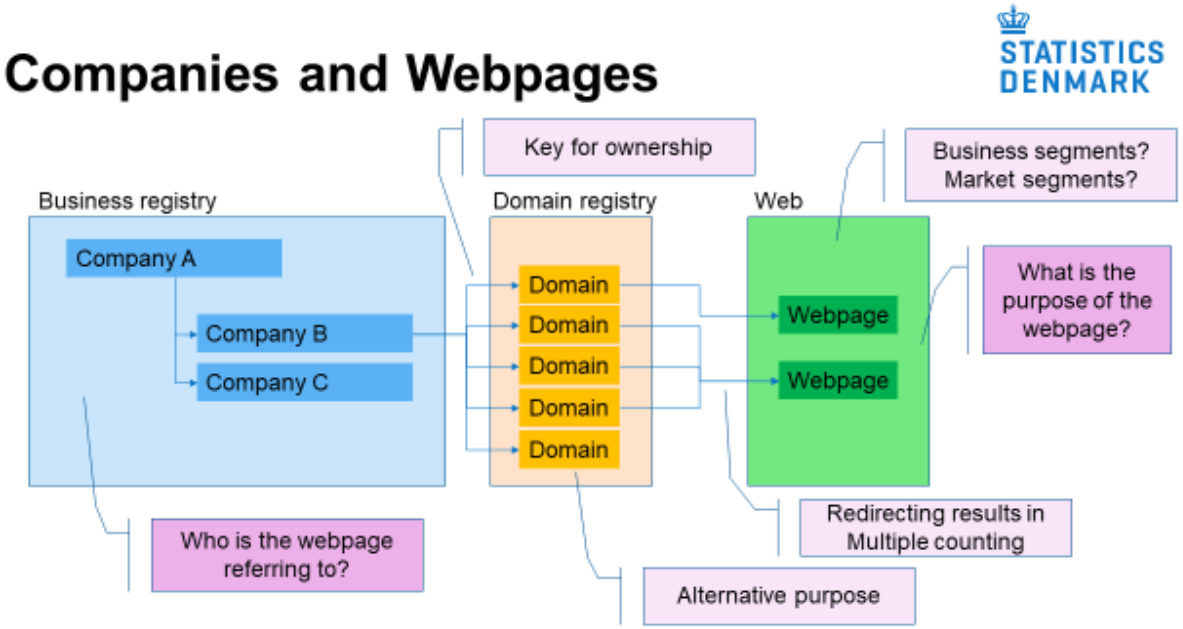
- Process 1/2: Merge existing registry data
- Process 2/2 (next slide): Identify URLs of the remaining population + validate

URL in SBR process 2/2



Analysis steps – status code

- A sample of 10.000 active companies from the business registry
  - 24 without a webpage
  - 2.890 with bad response (SSL error, timeout, DNS error)
  - 4.162 successful responses
  - 2.648 redirects
  - 216 client errors
  - 60 server errors



Status code frequency

STATISTICS DENMARK

Status Code	Frequency	Meaning	Interpretation
-4	666	SSL / TLS error	HTTPS handshake failed
-3	606	Timeout	The server did not respond within the timeout limit
-2	60	Connection error	The server could not be reached
-1	1.558	DNS error	The domain name could not be resolved
200	4.162	OK	The URL exists and responds correctly
301	2.357	Moved Permanently	The URL has been permanently moved
302	221	Found (Temporary Redirect)	Often used like 301 in practice
303	4	See Other	Usually used after form submissions
307	43	Temporary Redirect	HTTP method is preserved
308	23	Permanent Redirect	Modern replacement for 301
401	2	Unauthorized	Authentication required
402	2	Payment Required	Rarely used in practice
403	63	Forbidden	Access denied
404	110	Not Found	The requested resource does not exist
405	33	Method Not Allowed	HEAD requests are not accepted
410	3	Gone	The resource was permanently removed
429	3	Too Many Requests	Rate limiting or crawler blocking
500	34	Internal Server Error	General server failure
503	20	Service Unavailable	Server temporarily unavailable
52x	6	Web server error
